Our approach ensures that we provide transparent and independent services enabling your organisation to implement industry leading software solutions that provide better decision making capabilities.

We deliver Strategy & Management Consultancy to assist our clients identify, plan, select and implement successful Business Intelligence, Business Performance Management and Data Warehouse solutions.

➤ Sectors

Luminent specialises in the 3 sectors of:

- Business Intelligence
- Business Performance Management
- Data Warehousing

Business Intelligence and Performance Management are critical and maturing sectors in the Information Management space. They capture and use your corporate information, along with the skills and expertise of your employees to deliver intelligence. Ensuring that you have a clear strategy and a well managed implementation will give your organisation the competitive advantage.

Luminent offers international expertise in each of these fields and can deliver solutions that will improve the transparency, availability, range, control and value of your **reporting, analytics, KPI's, dashboards, budgets, forecasts, scorecards, Activity Based Costing and financial close processes.**

➤ Services

Luminent focuses on 3 core service lines:

- Strategic Consultancy
- Project Management and Governance
- Software and Developer Selection

By concentrating on Strategy and Management we ensure that our entire focus is on delivering the best advice to our clients. We can then assist in selecting the most appropriate software and implementation partner to develop the solution.

We have developed a product based approach to our service offerings, enabling us to provide a fixed price and outcome based solution. We have the ability to do this as we are experts in our field and have developed templates, plans and methodologies that are based on best practises and years of experience, across various industries and countries.

Call, email or look us up on the internet to see how we can assist you deliver world class Business Intelligence and Business Performance Management solutions.
